

HERMES SCREEN

Screens for point of sale and public information from Harkness Screens

Harkness Screens is a leading specialist projection screen manufacturer, using unrivalled experience and the latest technology to provide innovative solutions for audio visual, cinema and leisure markets worldwide.

THE PERFECT SOLUTION FOR AMBIENT LIGHT PROJECTION IN RETAIL, CORPORATE AND LEISURE ENVIRONMENTS

Harkness Screens, the world's leading screenmakers, proudly present the Hermes Screen, the latest development in the presentation of sharp, bright images...under almost any lighting conditions.

The Hermes Screen utilises true image technology to embed minute crystal particles into a micron thick layer within its 3mm acrylic surface, to provide the highest quality rear projection images.

Application

Largely unaffected by ambient light, Harkness Hermes Screens can carry your message in almost any retail, corporate and leisure environment:

- Window displays and showrooms
- Public and leisure areas - airports, theatres, hotels and restaurants
- Public houses and clubs
- Exhibitions and conferences
- Corporate reception and visitor areas

Operation

With a simple, yet effective mounting system, Hermes Screens can be easily installed in any location, either suspended or free standing - floor or table top.

Cable suspension sets and snap bars are available for standard screen sizes.

Surface type

A choice of rear projection surface is available with three variations of contrast factor.

- White - wide angle, gain 3.8. This surface is not suitable for short throw lenses.
- Cream - for the very brightest image, gain 8.0.
- Grey - use in ambient light areas for increased contrast, gain 3.0.

Size and shape

Hermes Screens are available in custom sizes to 3000mm x 2000mm and may be cut to virtually any shape.

Diagonal Image Size	Overall Size Width x Height	Diagonal Image Size	Overall Size Width x Height
