Strand Control Systems

Introduction

Strand's new Palette consoles build on the most successful lighting control operating system to bring you PaletteOS™, a high-resolution point/click graphic environment to unleash your creativity and speed up workflow. PaletteOS harnesses the power of Windows Embedded XP to create a powerful windows off line editor.

Sub Palette is powerful - up to 500 control channels and amazing automatic focus group controls that will slash your programming time. Pal-

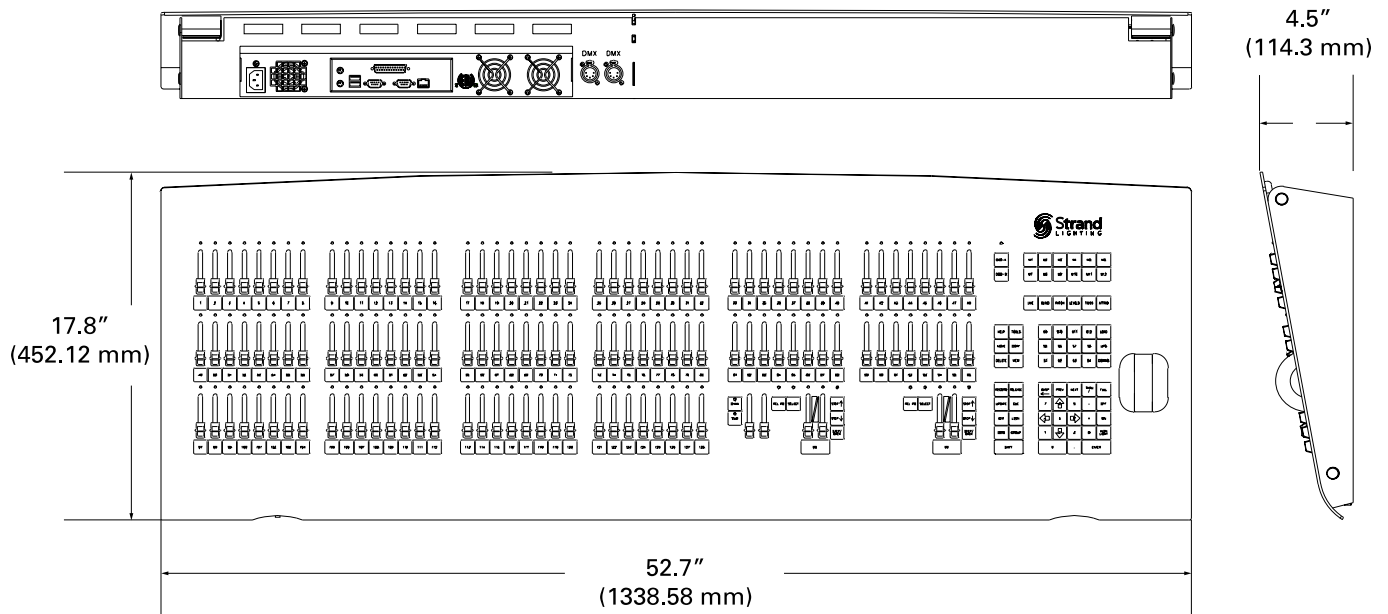

ette has a powerful web browser that lets you configure and monitor your network and interact directly with Strand's award-winning C21 dimming systems. Right there on the console screen.

And Palette is an elegant and highly functional lighting console, leveraging industry-standard technologies to make it robust and future-safe.

Palette's brain is a rugged industrial PC that could be swapped in seconds if you every needed to. Which you wouldn't. Probably.

Palette has a generous 40GB hard drive, or you can save your shows anywhere on the network. You even get a shiny new USB key for show storage over sneaker net.

Oh, and you can even network Palette OS with your existing Strand 300 and 500 series consoles, so no one gets left behind!
