

# INNO FOUR™ EFFECTS PROJECTOR

575 W HMI WITH MOTORZOOM AND GAM SX4

MOTORZOOM EFFECTS PROJECTOR  
WITH ZOOM LENS 25°-50°

Never before has there been so much punch in such a small package. But not only do you want your effects to stand out, you also want to control them.

*lighting innovations* INNO FOUR™ Effects Projector is based around the clear and punchy ellipsoidal optics of ETC's Source Four. Add the amazingly bright INNO DIM™ 575W HMI source, GAM's versatile SX4, the MOTOR ZOOM™ and the swift and smooth INNO DIM 170™, and you have an unrivalled effects projector with unrivalled control on your hands.

The amazing GAM SX4 offers over 14 loop effects, from fire to snow, stars to fish - you can even choose the new 6-gobo tray, allowing remote selection of any six glass or metal "M" size gobos.

Smoothly fade in your high intensity daylight beam - gradually soft focus - zoom out to 50° - and cut to blackout! You have never had so much control!

Slide-in modul with filmdrive

Slide-in modul with 6-gobo tray

## THE NEW INNO FOUR™ EFFECTS PROJECTOR INCLUDES THESE FEATURES:

- ✓ Based on INNO FOUR™ 575W HMI, 15° - 30° Zoom & 25° - 50° Zoom
- ✓ GAM SX4 effects cassette, motorised zoom and INNO DIM 170™ dimmer shutters
- ✓ Large and a growing number of easy to change effect loops
- ✓ Optional 6-gobo tray with remote or pre-programmed stand-alone operation
- ✓ Yoke Lock for secure, unmoveable positioning
- ✓ Precision zoom and focus control with separate DMX channel for each front lens
- ✓ Optional colorsroller
- ✓ Only one power lead and one DMX cable needed
- ✓ 200ms - 30 minute fades using INNO DIM 170™

# INNO FOUR™ EFFECTS PROJECTOR

575 W HMI WITH MOTORZOOM AND GAM SX4

## Source Four Effects Projector 750 Watt The cost effective solution for smaller venues

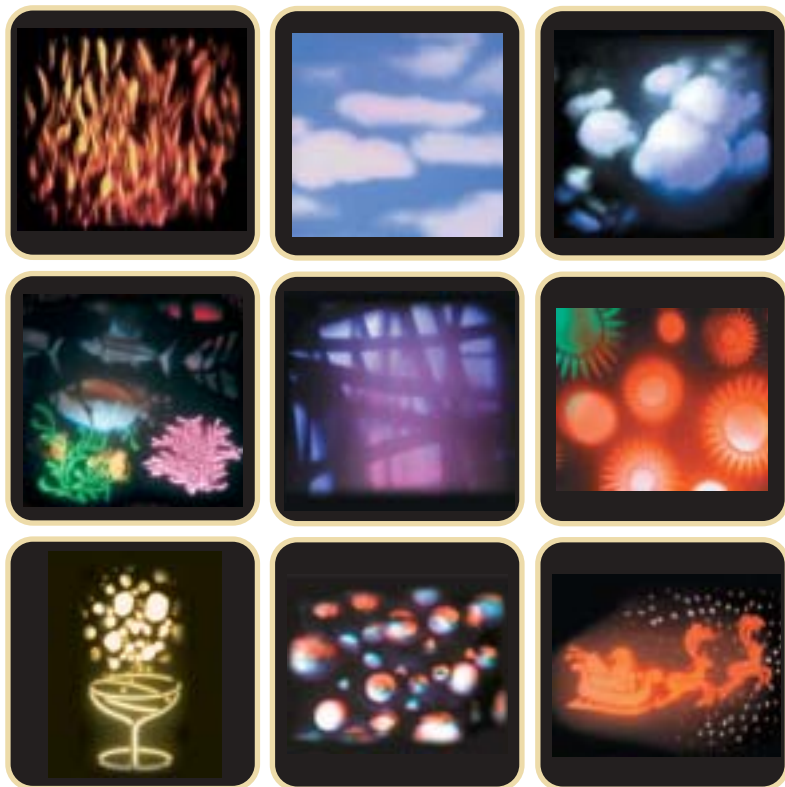

The GAM SX4 unit, order number TS6200, can also be used with the standard ETC Source Four profile with the HPL 750 W bulb and at all beam angles from 5° to 50°. The GAM SX4 easily snaps onto the Source Four and transforms it into a scenic projector capable of creating many spectacular effects.

Our new control box, order number LI-EFX/PSU for 230Vac 50Hz, will control the speed and direction of the SX4 by DMX512 as well as supply power.

This is an excellent solution if the tremendous light output and brilliance of an HMI light source is not required.
