

## ARRI Pax Panel Kits - A reference in LED Light Quality

The PAX LED panels provide an outstanding and unprecedented LED light performance by utilizing ARRI True Match LED Technology for natural light characteristics, single shadow rendering, consistent light output and absolute color stability.

The PAX LED panels will be available in two lighting kit configurations. PAX1 will provide a single panel configuration with soft and spot optics, backpack batteries, the ARRI Mini Controller and specially selected accessories.

PAX2 offers two LED panels in a stunningly versatile lighting kit with a full suite of control options including the Wireless Light Controller, PC software that allows for a wider range of colors and a DMX 512 interface.

The PAX LED lighting kits will be available from June 2009.
